

# Many Problem

## Assignment problem

assignment problem is a fundamental combinatorial optimization problem. In its most general form, the problem is as follows: The problem instance has...

## Many-body problem

The many-body problem is a general name for a vast category of physical problems pertaining to the properties of microscopic systems made of many interacting...

## N-body problem

In physics, the n-body problem is the problem of predicting the individual motions of a group of celestial objects interacting with each other gravitationally...

## Problem of universals

The problem of universals is an ancient question from metaphysics that has inspired a range of philosophical topics and disputes: "Should the properties...

## List of NP-complete problems

thousands of such problems known, this list is in no way comprehensive. Many problems of this type can be found in Garey & Johnson (1979). Graphs occur frequently...

## Travelling salesman problem

The problem was first formulated in 1930 and is one of the most intensively studied problems in optimization. It is used as a benchmark for many optimization...

## P versus NP problem

problem in computer science If the solution to a problem is easy to check for correctness, must the problem be easy to solve? More unsolved problems in...

## List of unsolved problems in mathematics

Many mathematical problems have been stated but not yet solved. These problems come from many areas of mathematics, such as theoretical physics, computer...

## Many-worlds interpretation

views time as a many-branched tree, wherein every possible quantum outcome is realized. This is intended to resolve the measurement problem and thus some...

## Problem of evil

omnipotent, omniscient, and a wholly good god. Concerning the evidential problem, many theodicies have been proposed. One accepted theodicy is to appeal to...

## **Fermi problem**

A Fermi problem (or Fermi question, Fermi quiz), also known as an order-of-magnitude problem, is an estimation problem in physics or engineering education...

## **User error (redirect from User problem)**

savviness, asserting that problems arising when using a device are the fault of the user. Critics of the term argue that many problems are caused instead by...

## **Problem solving**

consultants are largely problem solvers for issues that require technical skills and knowledge beyond general competence. Many businesses have found profitable...

## **Integer programming (redirect from Integer Programming Problem)**

programming problem is a mathematical optimization or feasibility program in which some or all of the variables are restricted to be integers. In many settings...

## **Problem gambling**

Problem gambling, ludopathy, or ludomania is repetitive gambling behavior despite harm and negative consequences. Problem gambling may be diagnosed as...

## **Three-body problem**

In physics, specifically classical mechanics, the three-body problem is to take the initial positions and velocities (or momenta) of three point masses...

## **Greedy algorithm (section Other problems with guarantees)**

algorithm that follows the problem-solving heuristic of making the locally optimal choice at each stage. In many problems, a greedy strategy does not...

## **Inverse scattering problem**

the inverse scattering problem is equivalent to a Riemann-Hilbert problem. Inverse scattering has been applied to many problems including radiolocation...

## **Scunthorpe problem**

The Scunthorpe problem is the unintentional blocking of online content by a spam filter or search engine because their text contains a string (or substring)...

## **Year 2038 problem**

The year 2038 problem (also known as Y2038, Y2K38, Y2K38 superbug, or the Epochalypse) is a time computing problem that leaves some computer systems unable...
