Saqiyuq is the name the Inuit give to a strong wind that suddenly shifts direction; Saqiyuq: Stories from the Lives of Three Inuit Women is a vivid portrait of the changing nature of life in the Arctic during the twentieth century. Through their life stories a grandmother, daughter, and granddaughter take us on a remarkable journey in which the cycles of life -- childhood, adolescence, marriage, birthing and child rearing - are presented against the contrasting experiences of three successive generations. Their memories and reflections give us poignant insight into the history of the people of the new territory of Nunavut. Apphia Awa, who was born in 1931, experienced the traditional life on the land while Rhoda Katsak, Apphia's daughter, was part of the transitional generation who were sent to government schools. In contrast to both, Sandra Katsak, Rhoda's daughter, has grown up in the settlement of Pond Inlet among the conveniences and tensions of contemporary northern communities - video games and coffee shops but also drugs and alcohol. During the last years of Apphia's life Rhoda and Sandra began working to reconnect to their traditional culture and learn the art of making traditional skin clothing. Through the storytelling in Saqiyuq, Apphia, Rhoda, and Sandra explore the transformations that have taken place in the lives of the Inuit and chart the struggle of the Inuit to reclaim their traditional practices and integrate them into their lives. Nancy Wachowich became friends with Rhoda Katsak and her family during the early 1990s and was able to record their stories before Apphia's death in 1996. Saqiyuq: Stories from the Lives of Three Inuit Women will appeal to everyone interested in the Inuit, the North, family bonds, and a good story.

The study of opacity falls under the general programme of showing how the meaning of any complex sentence is composed from the meanings of its constituent clauses, phrases and words. Opaque constructions are special from this point of view because the compositional principles that determine their meaning are so intricate. The main argument of this book is that the systematic ambiguity of opaque constructions has generally been underestimated.
