In this unique and extraordinary memoir, Ben Swankey sums up a lifetime of labour and socialist activism. He begins with a remarkable evocation of his Saskatchewan childhood in the farming community of Herbert. While still a teenager, Swankey hitchhiked and rode the rails to Vancouver, where he came in contact with the unemployed movement and made a lifelong commitment to socialism. This decision brought him into the Young Communist League and the Communist Party as an organizer in the massive protests that shook Alberta during the Depression, particularly the Edmonton Hunger March in 1932. He mobilized support for the On to Ottawa Trek, worked with Crow's Nest miners and ultimately was interned during the Second World War for his political beliefs. What's New gives unique first person accounts of these remarkable periods in Canadian history. After service in the Canadian artillery following his release from internment, Swankey became leader of the Labour-Progressive Party in Alberta before moving to Burnaby, BC with his family, in 1957. Here he began an entirely new career as a labour writer and policy analyst. His long, close friendship with Harry Rankin, BC's crusading labour lawyer and long-time city councillor, gave him an unparalleled perspective on the labour and political life of the province. Swankey remained active into his 80s, working with the Council of Canadians and BC seniors' organizations to defend and expand our Medicare system. This is the life story of a unique Canadian.

There are universal laws of selling that determine whether you succeed, or don't succeed — whether you earn enough to enjoy the lifestyle you want or struggle to make ends meet. When you align the wind with your sails, you move effortlessly across the water. When your sails are out of alignment, you flounder and go nowhere. If you align your thinking and actions with these powerful laws of selling, you will be more effective and efficient. You will encounter less friction, require less energy, and get bigger results faster. Here's a sampling of Jeffrey's 21.5 Laws of Selling: • Deliver Value First • Ask Before Telling • Communicate in Terms of Them • Become Your Own Brand • Earn Referrals and Testimonials without Asking • Create Loyal Customers These 21.5 Laws are the rock foundation of selling. They may be invisible but they are undeniable — and unbreakable. If you're just getting started in selling, you will find the Laws invaluable. Whether or not you learn them and follow them will make or break your career. If you've been in sales for a while, you will find yourself saying, "I haven't been doing that." "I knew that! How did I forget?" When we break the Laws we pay the price. Our sales suffer. Our bank account takes a hit. It's an effort to get out of bed and make a sales call, to do our best work — work that is aligned with the Laws. Use Jeffrey's Laws of Selling to recharge your enthusiasm and redirect your actions back to what really works.

The authors of the classic *Difficult Conversations* teach you how to take criticism productively in *Thanks for the Feedback*. We get feedback every day of our lives, from friends and family, colleagues, customers, and bosses, teachers, doctors, and strangers. We're assessed, coached, and criticized about our performance, personalities and appearance. We know that feedback is essential for professional development and healthy relationships - but we dread it and even dismiss it. That's because while we want to learn and grow, we also want to be accepted just as we are. *Thanks for the Feedback* is the first book to address this tension head on. In it, the world-renowned team behind the Harvard Negotiation Project offer a simple framework and powerful tools, showing us how to take on life's blizzard of comments and advice with curiosity and grace. I'll admit it: *Thanks for the Feedback* made me uncomfortable. And that's one reason I liked it so much. With keen insight and lots of practical takeaways, it reveals why getting feedback is so hard - and then how we can do better' Daniel H. Pink, author of *To Sell Is Human* and *Drive* 'Thanks for the Feedback is a road map to more self-awareness, greater learning, and richer relationships. A tour de force' Adam Grant, Wharton professor and author of *Give and Take* Douglas Stone and Sheila Heen are Lecturers on Law at Harvard Law School and cofounders of Triad Consulting. Their clients include the White House, Citigroup, Honda, Johnson & Johnson, Time Warner, Unilever, and many others. They are co-authors of the international bestseller *Difficult Conversations*. Stone lives in Cambridge, MA. Heen lives with her husband and three children in a

The most important distinction we can ever make in our lives is between who we are as an individual and our connection with others. Can we truly love another and be a whole, complete and unique person? How do we know the difference between our fear and a partner's or between our past anger and our here-and-now anger? The answer lies with boundaries - and this is a practical guide to unlocking these mysteries.

Causal analytics methods can revolutionize the use of data to make effective decisions by revealing how different choices affect probabilities of various outcomes. This book presents and illustrates models, algorithms, principles, and software for deriving causal models from data and for using them to optimize decisions with uncertain outcomes. It discusses how to describe and summarize situations; detect changes; evaluate effects of policies or interventions; learn what works best under different conditions; predict values of as-yet unobserved quantities from available data; and identify the most likely explanations for observed outcomes, including surprises and anomalies. The book resents practical techniques for causal modeling and analytics that practitioners can apply to improve understanding of how choices affect probabilities of consequences and, based on this understanding, to recommend choices that are more likely to accomplish their intended objectives. The book begins with a survey of modern analytics methods, focusing mainly on techniques useful for decision, risk, and policy analysis. Chapter 2 introduces free in-browser software, including the Causal Analytics Toolkit (CAT) software, to enable readers to perform the analyses described and to apply modern analytics methods easily to their own data sets. Chapters 3 through 11 show how to apply causal analytics and risk analytics to practical risk analysis challenges, mainly related to public and occupational health risks from pathogens in food or from pollutants in air. Chapters 12 through 15 turn to broader questions of how to improve risk management decision-making by individuals, groups, organizations, institutions, and multi-generation societies with different cultures and norms for cooperation. These chapters examine organizational learning, community resilience, societal risk management, and intergenerational collaboration and justice in managing risks.

For the first time in English, this anthology offers a comprehensive selection of primary sources in the history of philosophy of language. Beginning with a detailed introduction contextualizing the subject, the editors draw out recurring themes, including the origin of language, the role of nature and convention in fixing form and meaning, language acquisition, ideal languages, varieties of meanings, language as a tool, and the nexus of language and thought, linking them to representative texts. The handbook moves on to offer seminal contributions from philosophers ranging from the pre-Socratics up to John Stuart Mill, preceding each major historical section with its own introductory assessment. With all of the most relevant primary texts on the philosophy of language included, covering well over two millennia, this judicious, and generous, selection of source material will be an indispensable research tool for historians of philosophy, as well as for philosophers of language, in the twenty-first century. A vital tool for researchers and contemporary philosophers, it will be a touchstone for much further research, with coverage of a long and varied tradition

that will benefit today's scholars and enhance their awareness of earlier contributions to the field. \u200b

What's New in Cardiovascular Imaging is a bibliographical "image" of a Symposium held June 22-24, 1998 in Leiden, the Netherlands. At this Symposium all the major advances in cardiovascular imaging in all the cardiovascular imaging modalities (X-ray, (intravascular) ultra sound, magnetic resonance, scintigraphy and CT) were addressed by the leading authorities in this field. Based on the presentations of the invited Faculty, this book consists of a compilation of manuscripts related to most of the topics discussed at this particular meeting. We express our gratitude to all authors and coauthors for having made great efforts in preparing their superb up-to-date chapters under a great time pressure, so that this book was available at the time of the Symposium. The authors are all excellent investigators in one or more fields of cardiovascular imaging and they have stimulated progress in cardiovascular imaging with the aim to improve patient care and clinical research. This book consists of a total of 32 chapters subdivided into seven Parts. Each part describes a particular field in cardiovascular imaging. These Parts are: Coronary quantitation by QCA and intracoronary ultrasound (QCU), angiographic trials, progress in intravascular ultrasound, magnetic resonance (MR) coronary and vascular imaging, nuclear cardiovascular imaging, echocardiography, and cine and spiral CT coronary imaging. In general, each Part begins with a chapter that provides a broad overview of the advances in the field described in that particular Part, as well as a view towards the future.

Thinking of launching your own hedge fund? Want to learn more about the different steps involved in setting up and scaling a hedge fund? Want to understand what are the global best practices in order to grow your existing hedge fund and attract institutional investors? This book is the first hands-on publication to set out in concrete and practical terms the various steps and considerations necessary to successfully launch and manage a hedge fund in Asia, with a particular focus on Hong Kong and Singapore. Whilst most other hedge fund books cover the investment side of the hedge fund business, this book specifically provides in-depth insights into the crucial – and often misunderstood – non-investment aspects involved in launching a hedge fund business. It places particular focus on the legal, regulatory, fund structuring, tax, governance, capital raising, fund terms, budgeting, talent, office space, technology, operational and service provider selection considerations, from the pre-launch phase to the expansion and institutionalisation of the business. It is written for: any individual or team aiming to launch a hedge fund and seeking practical and experienced guidance; any existing hedge fund manager looking to grow and attract institutional-quality capital and investors; any fund manager or other industry participant globally intending to set up a presence in Asia any academic looking to learn more about the practical aspects of the hedge fund industry any student hoping to discover more about the hedge fund industry as a career choice.

This is a comprehensive step-by-step guide to incorporating solution focused techniques into everyday practice. Solution focused therapy helps clients to identify how their lives would be without their problems by exploring current client resources and strengths, and their hopes for the future. Instead of dissecting the problem, it looks at what is different when the problem isn't happening or is less severe. These times are the building blocks of solutions. Solution focused methodology is increasingly used within community mental health teams, mental health charities, inpatient settings, education and business, as it is a well-structured and demonstrably effective approach. This book provides: guidance for practitioners to gain the skills they need to move from problem focused work to searching for solutions; a comprehensive step-by-step guide to using solution focused techniques and integrating them into existing practice; a brief review of the evidence base on solution focused therapy; ample exercises to give to clients to help them move away from their problems to finding solutions; and, clear instructions on how to adapt these techniques for specific populations such as individuals with substance misuse problems, individuals in crisis, anger management and working with couples. This is a very clear and practical guide to using solution focused brief therapy in everyday practice and will be invaluable for all practitioners wanting to incorporate these techniques into their work.

The result of a conference on language and related cognitive processes in animals, this book brings together scientists working on language and communication, reviews research done on language in apes and dolphins, and places this work in a larger perspective of animal communication and cognition. The conference convened an international group of distinguished scientists interested in exploring the neurological, cognitive, social, and behavioral aspects of communication in animals. A broad spectrum of perspectives was represented, including naturalistic investigations of animals in their natural habitat as well as strictly controlled laboratory investigations. Similarly, a broad range of species was described including rats, parrots, monkeys, apes, dolphins, and humans. New methodologies and perspectives are continuously emerging that allow consideration of issues that previously could not be resolved. Emerging technology such as video equipment and advanced database systems allow one to exhaustively record in an accessible format the evidence on which scientific conclusions must be based. Investigation of animal language and communication is a small, but vigorously exciting area of scientific investigation as the chapters in this volume clearly attest.
